- **MS Office** : Word, Excel, Power point
- **Learning** : React and powerBI

CERTIFICATIONS

- Gemini of Google workspace
- Microsoft Copilot studio

PROJECT I WORKED ON

Project name : E-panchayat

Project Summery

- **E-Panchayat** is an online system that helps village people do their panchayat-related tasks from anywhere, anytime—saving time and effort.
- They can submit requests, file complaints, and contact officials without going to the office.
- It's easy to use and helps bring transparency, speed, and digital growth to rural areas.

Existing System

- According to the existing system, people are doing all their work manually pen and paper.
- If any person faces any problem, they have to go to the Sarpanch to report their problem. Which is not possible all the time.
- After reporting your problem, you didn't even know if it was resolved or not.
- If some new scheme is out, not everyone will know about it.

Proposed System

- With our project **E-panchayat** all the work which was done by manually, can now be done online.
- If you have made a complaint, you can also get complete details of the steps taken to resolve it.
- Along with this, all members can get notifications of any new schemes and other important information through this application.
- Through which There will be transparency between the people and the Panchayat.
